

To whom it may concern:

I am extremely concerned about the pending deregulations in the communications industry. I am of the opinion that this will only lead to consolidation of commercial media power in the hands of a few conglomerates across the country and thus lead to a drastic reduction in the spectrum of opinion expressed by the media. This will directly harm American consumers (the residents of this country). Please carefully analyze and reconsider any deregulatory positions and actions. Thank you very much.

Sincerely,  
Tushar Kansal
